Child Protection and Creating Safe Environments—Is Your Child Street Smart? Being street smart means knowing how to keep yourself safe from strangers when you're alone or with other kids. When your street smart you know your way around, you know how to handle yourself in tough situations and you can "read" people. Teach your child who are strangers (anyone they do not know or kind of know) and to never approach a strangers vehicle. Teach to your child to always tell you where they are. Teach your child to always go with a friend or two whether walking to school, bike riding, or going to the store. Pick out safe spots where your child can go and get help. Places like police stations, stores, restaurants. Teach them how to spot safe places on their route and to avoid places that aren't safe. Finally, teach your child to trust their instincts and to make a lot of noise if they are scared. For more information visit www.kidshealth.org.
